

A safety data sheet is not required for Abbott Neuromodulation products, according to the OSHA Hazard Communication Standard, 29 CFR 1910.1200. These products are considered a medical device as defined in 29 CFR 1910.1200(b)(5)(iii)—to which the requirements of the Hazard Communication Standard do not apply.

They are also exempted from the labeling requirements of this standard under 29 CFR 1910.1200(b)(5)(iii)—which exempts foods, drugs, cosmetics, medical devices and similar items, when they are subject to the labeling requirements under the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 301 et seq.) and the regulations issued pursuant to that Act.

We thank you for your inquiry and your efforts to ensure the safety of your employees. Please contact us if you have any further questions.
