

Kaletra[®]

Security Features

(Bottles)

As part of Abbott's ongoing efforts to enhance patient safety and combat counterfeiting of pharmaceutical products, Abbott is incorporating security features into Kaletra packaging materials worldwide. This transition may require several months to complete. Please exercise normal due diligence prior to dispensing or using existing inventories of Kaletra that do not have the new features.

For your security, please note:

1. Kaletra bottle labels are printed with one of two different color-shifting inks. When viewed at one angle, the ink appears either brown or violet in color depending on the ink used. When changing the viewing angle, the ink gradually changes colors to eventually appear green.
2. You should accept a Kaletra bottle only if the ink on the label shifts colors as described above. Please contact Abbott immediately if you suspect that you have received counterfeit Kaletra.
