

Zemplar[®] Security Features (Bottles/Vials/Ampules)

As part of Abbott's ongoing efforts to enhance patient safety and combat counterfeiting of pharmaceutical products, Abbott is incorporating security features into Zemplar packaging materials. This transition may require several months to complete. Please exercise normal due diligence prior to dispensing or using existing inventories of Zemplar bottles, vials or ampules that do not have the new features.

For your security, please note:

1. Zemplar bottle, vial and ampule labels are printed with color-shifting ink. When viewed at one angle, the ink appears violet in color. When changing the viewing angle, the ink gradually changes colors to eventually appear green.
2. You should accept a Zemplar bottle, vial or ampule only if the ink on the label shifts colors as described above. Please contact Abbott immediately if you suspect that you have received counterfeit Zemplar.
