

Fact Sheet

Abbott Manufacturing Singapore

Abbott is a leader in providing safe, high-quality and effective nutrition products for infants, children and adults. Abbott Manufacturing Singapore (AMS), Abbott's first nutrition plant in Asia, is the company's single largest investment in Asia and its largest nutritional investment. AMS will serve up to 1 million Asian infants and children each year. Abbott currently operates 11 nutrition manufacturing facilities around the world. This plant is a fully integrated facility for the production of its nutrition products.

- **Investment:** Approximately S\$450 million/ US\$300 million
- **First product:** January 2009
- **Total floor area:** 52,000 square meters/ 570,000 square feet

Strategic location in Asia: Singapore offers numerous benefits as a regional distribution hub: a highly educated and motivated workforce; world-class quality and food safety standards; and excellent port facilities. This location will reduce product delivery time to customers in the region, which will extend the shelf-life of Abbott Nutrition's products and increase product availability for customers in Asia.

Providing employment opportunities: The plant currently employs 300 people. It has a multicultural workforce, with employees from countries across the region, including Singapore, Malaysia, Thailand, Vietnam, China, India and Indonesia.

Environmentally friendly features: Abbott has taken great care to ensure that it minimizes the impact of the plant operations on the environment. These measures include systems for monitoring and minimizing energy usage, water waste and provisions for recycling. The plant received Singapore's Green Mark "Gold" certification by the Singapore Building and Construction Authority.

State-of-the-art manufacturing: Abbott maintains the most stringent, international manufacturing standards to ensure that its nutrition products are safe and effectively improve the health and well-being of consumers. The plant's manufacturing environment, and equipment and procedures, are designed to achieve the highest level of process control and conformance with current good manufacturing practices through every step of the manufacturing and distribution process.

The same product quality: Singapore-made products are the same as those made in Europe and the United States, with the same high-quality ingredients and testing standards.
