

THE INSIDE STORY OF A PACEMAKER REVOLUTION

Every day, we wake up to a changed world. Maybe you recall the first time you saw an electric car. Or the day you found out you could ask a speaker to read you the weather report.

Well, today might be the day you discover that the pacemaker -- that trusty heartbeat helper -- has changed forever.

You see, one day a team of our engineers woke up and committed themselves to creating a truly breakthrough medical device. This is their story.

THE REVEL IS IN THE DETAILS AVEIR DR SYSTEM

This month's focus: Our [AVEIR DR dual chamber leadless pacemaker system](#). These two leadless pacemakers function as a single unit by constantly keeping in touch -- using our novel [implant-to-implant \(i2i\) communication technology](#). Each i2i message (technically a "packet" of data) lasts 2 milliseconds. That means you could fit 500 of them into one second!
