

Welcome to our quarterly newsletter highlighting some of the many ways Abbott is improving lives around the globe.

In this issue, we highlight Abbott’s new partnership with Elmo and friends at Sesame Workshop to help kids build a healthier future. We also welcomed our new colleagues from Exact Sciences, earned the No. 4 spot on Fortune’s list of America’s Most Innovative Companies, and more.

Top Story: Helping families build healthy habits with Sesame Workshop

In January, Abbott announced a new partnership with Sesame Workshop aimed at helping children and families build healthy habits early to help prevent chronic disease later in life.

The collaboration brings together Abbott’s deep experience in the diagnosis, prevention and management of chronic disease and Sesame Workshop’s beloved characters to support caregivers with easy-to-use, multilingual resources focused on building healthy patterns around nutrition, movement and sleep.

Together, Abbott and Sesame Workshop are meeting families where they are to make healthy choices more approachable, practical and part of everyday life. You can download the resources to share with family and friends at Sesame.org/HealthyHabits, and learn more about our partnership [here](#).

In case you missed it

Expanding access to health tech

America’s Most Innovative Companies

Abbott was named one of America’s most innovative companies by Fortune, ranking No. 4. We were the top-ranked healthcare company, joining Alphabet, Microsoft and Apple at the top of the list. [More](#)

Exact Sciences is now Abbott

Alongside our new colleagues, we’re advancing earlier cancer detection and helping to support personalized treatment decisions for millions of people by accelerating innovation and expanding access to life-changing tests. [More](#)

How tech is transforming healthcare

As healthcare accelerates into an AI-driven era, there’s tremendous opportunities to expand what’s possible, from more precise diagnostics tools to connected medical devices and smarter enterprise systems. [More](#)

How do you detect AFib accurately? With the ‘eyes’ of AI

With Abbott’s Assert-IQ insertable cardiac monitor (ICM) system, we’re showcasing how health technology can detect AFib early and allow your doctor to adjust your care plan to keep your life moving forward. [More](#)

Transforming wellness, prevention and care

Gen X: Time for heart health check

Did you know estrogen levels decline during perimenopause and menopause? This can be associated with increased heart disease risk, so if you’re Gen X, it may be time for a heart health screening. [More](#)

Celebrating the “We Give Blood” champions

We recognized the University of Wisconsin-Madison for winning Abbott and Big Ten’s 2025 “We Give Blood” competition. The Badgers received \$1 million to advance student and community health. [More](#)

Life-changing heart care for kids ... and puppies

Our devices help kids – they help puppies too. Abbott brought together children and puppies sharing the same heart condition, all treated with Abbott devices, for a playdate highlighting how advanced treatments create life-changing moments for families. [More](#)

Partnerships for health

Building healthier futures through healthier habits

We’re expanding the reach of *Future Well™* Kids with the Boys & Girls Club of Lake County, Illinois. Abbott volunteers participated in an event to teach kids how to avoid developing chronic disease. [More](#)

Workforce of tomorrow

Gallup Exceptional Workplace Award

Abbott earned recognition for creating an engaging, supportive workplace where employees can grow, contribute and make a meaningful difference. [More](#)

Helping college grads get ready for today’s jobs

Abbott is helping bridge skills gaps by investing in learning, training and real-world experience for the next generation workforce. [More](#)

Retirement is changing – companies need to change, too

With more employees retiring than ever before, companies need to rethink how they’re replacing talent, and a “phased retirement” program is a way for more seasoned employees to share their expertise before departing. [More](#)
